

# Built-in Planters

---

Built-in planters are prepared on polystyrene blocks tailored to the internal dimensions of your container.

Unpack the planters.

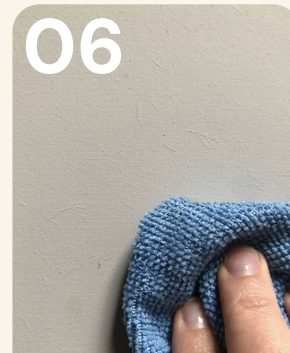

Insert each planter into its container pot.

Retrieve the bag of bark delivered with your planters (quantity adjusted based on the number of units ordered).

Scatter the bark over the block so that it is completely hidden from view.

Finally, remember to clean the planter container with a microfiber cloth and gently spread open the plants if needed.
