

## Installation guide

# Ludiq Divider Structure

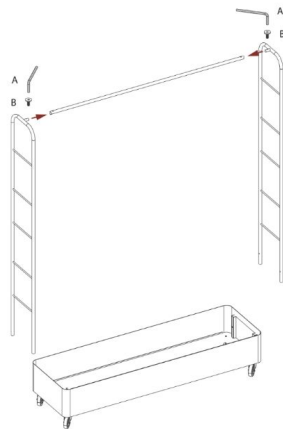

Two people are recommended to assemble the module.

Make sure to place the elements on a flat surface during handling to avoid damaging the product.

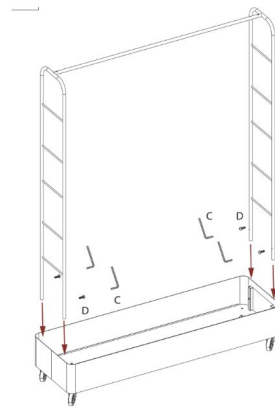

Before starting, remember to remove the plants from the main trough to be able to assemble the module.

	A x 1
	B x 2
	C x 1
	D x 4

Provided Hardware

Using the provided screws and tightening wrench, assemble the two arches with the top lateral bar.

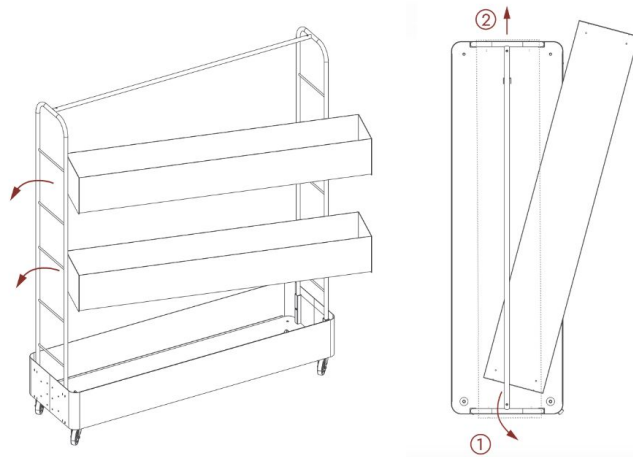

Secure the structure to the base trough using the 4 remaining screws.

Add the plants as well as the finishing trim for a perfect result!

# Ludiq Divider Structure

Plants do not need to be removed from the hanging troughs to install the planters.

Perform several rocking movements: first sideways to slide the troughs between the bars of the lateral upright , then upwards to push them and allow the trough to slot into the second upright.
